QUAD-RINGS

We are popular as one of the most pre-eminent [Quad Rings Seals Manufacturers](#) from India. These unique Quad Rings Seals are designed specially by our team keeping in mind the client's requirements.

These Quad seals are four lipped seals with a specially developed sealing profile that provides twice the number of sealing surfaces as an [O-Ring](#). The main advantage of this unique four lipped design is that provides lower friction than an [O-Ring](#) and due to its square cross section, it resists spiral twist. Widely used in both dynamic as well as static industrial applications.

In static application method application Quad seals are fitted in the assembly where there is no dynamic movement. In the dynamic system quad seal is stretched over the root of a groove with help of an internal groove, whereas for external grooves, these seals are installed in compressed format.

2 Out of 3

Furthermore, we also subject our product to strict quality monitoring processes at multiple levels in our production process to determine the best [quality](#) and design features.

We have been supplying Quad Rings Seals in India for past 17 years and have earned good will of major Automotive and non-automotive industries, who trust our product for its quality and flawless design.
